

Leading paper sustainability globally

Introducing RePaper – The innovative line of premium, 100% post-consumer recycled paper that also celebrates sustainability and environmental excellence.

RePaper’s breakthrough production process transforms waste streams of paper and cardboard into high-quality paper.

This paper goes beyond being tree-free: it features the lowest material, energy and water consumptions in the paper industry and a carbon footprint that rivals electronic media!

FSC Certified 100% post-consumer recycled paper
